Water-Based Barrier Coating (WBBC)

WBBC is a new cup coating technology to coat coffee cups and food containers. This is a green alternative to replace plastic coating: PE, PP & PLA coatings and largely reduces the use of single-use plastic (SUPs) in community. Our food packaging products are **on list in Green Tableware Platform by HKQAA**, that all food packaging is complied with govt's regulation on disposable plastic tableware.

This coating applied in food packaging are safe for direct food contact and able to provide the leak and grease-proof benefits. With this new coating, our products are not only commercial compostable and biodegradable, but also recyclable. They can be recycled via community recycling networks.

Features:

- Heat sealable
- Grease resistance, water repellence, moisture vapor
- Comply with FDA, EU food contact regulation
- Low VOC
- Fully recyclable
- High repulpability
- As more environmentally solution to replace conventional polymer-based coating
- Capable in existing wastepaper recycling facilities

Hot Cups

Products	Item code	Description	Material /Coating	Color	Top x Bottom x Height (mm)	Pcs/Ctn
Single Wall Hot Cup	BCC012	4oz Single Wall Cup	Water-based barrier coating	White	62x45x61	1000
